

**Defect ID:** 104

**Title:** Boundary Validation Fails on Task Title Input: Min Value 3 and Max Value 52 Not Enforced

**Reported by:** Ajith Lal

**Defect Priority:** Medium

**Defect Severity:** Minor

**Description:**

The boundary values on the character limit on Task Title input box are failing as the current min value is 3 and maximum value is 52.

**Steps to Reproduce:**

1. User login the application
2. Navigate to Topic Module
3. Create a new task and open the task
4. Attempt title with 2 characters and observe the warning
5. Attempt title with 51 characters and observe that no warning is appeared

**Expected Result:**

The Task Title input box should accept a minimum of 2 characters and a maximum of 50 characters.

An error message or validation should trigger if the input is below 2 characters or exceeds 50 characters.

**Actual Result:**

Incorrect boundary values for title field

**Attachments/Defect Artifacts:**

The image contains two screenshots of a web application's 'New task' form. The top screenshot shows the 'Title' field with the input '22'. The field has a red border, and a red error message below it states: 'Title must have minimum 2 and maximum 50 characters.' The bottom screenshot shows the same 'New task' form with the 'Title' field containing the text 'This is a sample task title with exactly fifty-two'. This field has a blue border and no error message is displayed. Both screenshots show a user profile icon and an upward arrow in the top right corner of the form container.
